

The Ringaro Telecom Web Centrex solution is like a powerful and advanced version of Hosted PBX and UCaaS. It's designed for resellers who want to succeed by offering a wide range of business-class features in an easy-to-use platform.

With Ringaro Telecom Web Centrex, you can confidently tap into the growing market for cloud communications services. The platform is built with top-notch components and supported by experienced industry experts, ensuring reliable and enterprise-grade solutions.

Key Features:

Ringaro Telecom takes advantage of a smart network architecture to provide flexible and efficient calling features. It's designed to stay up-to-date with future technologies and evolving market demands, adding new features seamlessly.

Scalability:

As a fully managed service, Ringaro Telecom takes care of growth-related challenges, allowing you to focus on your business. Whether you have a few customers or thousands, you'll experience consistent and dependable performance.

Reliability:

We understand the importance of uninterrupted service, so we've prioritized reliability at every level. We offer 99.999% service level guarantees for critical functions, ensuring peace of mind.

Redundancy:

The Ringaro Telecom platform is built on a redundant infrastructure, backed by leading data centers in New York and Dallas. Our advanced technology and seamless failover process guarantee the highest possible uptime.

Pricing:

Our per-seat pricing model lets you pay as you grow, without upfront capital expenses, and with predictable operating costs.

Telco:

Ringaro Telecom offers flexibility in choosing your own termination providers or using our competitive prepaid DIDs and PSTN termination services through our reliable carrier network. Our Telco portal streamlines the ordering and management process for your convenience.
